WORK EXPERIENCE

TATA Consultancy Services | *Angular 5 & NodeJS Developer*   **Dec 2017 – Present**

- Developing Angular 5 application using Redux design pattern.
- Developing Nodejs and MongoDB backend using microservices architecture.
- Integration with multiple applications and services within large scale intranet.
- Work in an Agile environment with 2 week long sprints and daily Scrum meetings.
- Developed Proof of concept features to solve business problems and saved ~$35k.
- Upgraded application from Angular 4 with outdated custom webpack configuration to industry wide standard solution.
- Developed solutions to solve time consuming process of developing services for generating and updating Mock data for development and testing to reduce Developer and QA downtime.
- Mock data solution is actively being utilized by several teams within the company and saving many hours in testing and development.
- Facilitated application wide refactor to follow best practices and make development easier and more intuitive
- Utilize Jenkins, IBM UrbanCode Deploy, and IBM Bluemix to build and deploy applications and services.

NRI Global Inc. | *PHP Web Developer*   **Sept 2017 – Dec 2017**

- Developed php Laravel backend of ecommerce site and internal application that controls all business operations.
- Built APIs to facilitate communication between internal and ecommerce site to solve business problems along with any relevant UI (jQuery/Vue/Bootstrap) implementations for employees.
- Assisted in ensuring code integrity and maintain smooth-running business operations of new Laravel systems from legacy php code during cutover phase.
- Assisted and fixed bugs and problems that arose

PROJECTS
Additional links on my website

AngularMB
angularmb.bitballoon.com

- Message board app similar to Reddit that allows users to create their own boards and make posts and comments on other users' posts
- Built with Angular 4 frontend and uses JSON Token based authentication via PHP Laravel backend

NBAGoats
nbagoats.herokuapp.com

- Compares and ranks NBA players to see who is the Greatest Of All Time based on public perception through the ELO rating algorithm (commonly used to rank chess players).
- Built using PHP Laravel and employs MVC design and RESTful API endpoints for CRUD functionality.

StarterAPI
starterapi.herokuapp.com

- A REST API for commonly used dummy blog data for testing, learning new frameworks, and/or demo purposes
- Built with PHP Laravel and VueJS

EDUCATION

Honors Bachelor of Science (H. BSc) University of Toronto   **2012-2017**

- Major: Human Biology, Minors: Physiology and Immunology
- Computer Science:
    - Intro to Programming, Intro to Computer Science
    - Software Design
    - Probability and Statistics with Computer Applications
    - Calculus I, Calculus II, Discrete Mathematics
